# Invitation

Dear Ladies and Gentlemen,

from August 16 to 31, 2023 the 15th Summer University Ingenieurinnen-Sommeruni offers compact teachings in electrical engineering, information technology, chemical and mechanical engineering for **women students of all types of universities and colleges** as well as for **women professionals** interested in further training. The Ingenieurinnen-Sommeruni focuses on gender-inclusive course reforms and networking between women in engineering and technology. Entering higher education, developing student careers, transition into labor market and lifelong academic learning are equally in the field of vision.

Every year 200-250 women students and professionals from national and international universities and colleges take part in the two-week **Summer University at Bremen University**. With experience of many years the Ingenieurinnen-Sommeruni presents a successful forum for exchanging the **latest expert knowledge** and **networking internationally**.

**Sponsoring** Ingenieurinnen-Sommeruni at the University of Bremen creates opportunities

- for personally establishing contacts with women students and professionals in engineering and technology
- for broadening your scholarship programs with dedicated women students
- for demonstrating equal opportunities and diversity within your company
- for presenting your programs for women managers
- for introducing your technical products and services
- for winning new women employees

## Promoting Gender Diversity Practices

Companies with gender sensible organizational concepts and successful personal management strategies to promote women engineers to a broad spectrum of leading positions are invited to present their best practices to the participants of Ingenieurinnen-Sommeruni. Please contact Henrike Illig.

## Scholarships for women students

You are invited as a company to support motivated women students with a subvention of travel and accommodation costs as travel expenses scholarships.

Regularly we reimburse:

- subventions for accommodation
- as well as travel costs

Interested students send us their application for a scholarship. The selection will be made in agreement with you.

The payment of the scholarships can be made directly through your company or through the University of Bremen. Your support can be general or a single scholarship.

## Networking Events

Besides the courses networking events for participants and lecturers will be organized every evening during the whole summer university. There is the possibility to organize one of these events as a sponsor and present yourself during it. Your networking event could look like this:

- **What?** A company presentation or a lecture with reception, hosting a dinner or city tour are possible.
- **Where?** The event could take place at any location in Bremen. You can use rooms of the University of Bremen as well. We gladly support you in the organization and choice of location.
- **Contents?** As a sponsor you have got the possibility to present your company or it's special sectors during the networking event.
- **Catering?** You have got the choice! We support you in the selection of a suitable catering if necessary.

# Key information on Ingenieurinnen-Sommeruni 2023

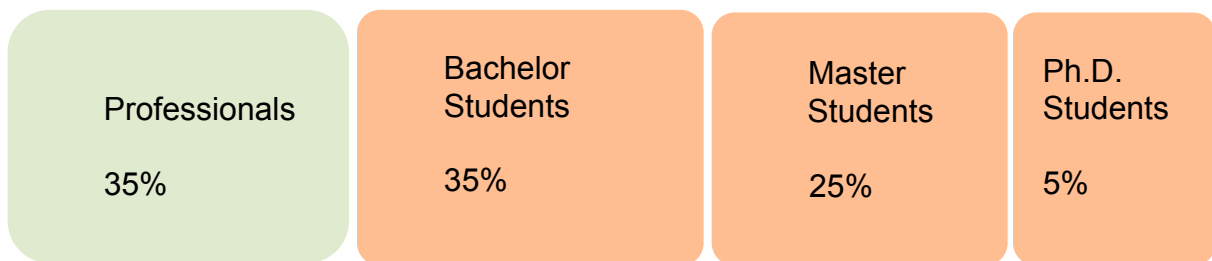

## Date

The 15th international Ingenieurinnen-Sommeruni takes place from August 15 to 31, 2023 at the University of Bremen, Germany.

## Participants

The Ingenieurinnen-Sommeruni is directed at women studying or holding a degree in engineering and technology or in a related discipline. The participants, 200 to 250 per year, are women students of national or international universities and colleges as well as women professionals.

## Women students and professionals at Bremen Summer Universities

## Course program

In about 60 different courses, each lasting 2 to 6 days, women experts offer innovative knowledge and hands-on learning in different subject areas of engineering and technology. Lecturers and participants are able to gain a lot from the course offer through the limited group size, the interdisciplinary contents and the close contact between lecturers and participants. Course languages are both, German and English.

The concept combines empowerment and knowledge transfer for women in technology. It is based on more than 25 years of experience, developed and successfully implemented at Bremen University.

Simultaneously at Bremen University, there will be held **the 26th Informatica Feminale**, the international Summer University for Women in Computing.

**Women engineers and computer scientists can be addressed by all sponsoring activities.**
